SOCIOLOGY

CAREER INFORMATION

Sociology is the study of the human behavior and relationships between groups. Sociology research provides insights that help us understand the different ways individuals and groups make decisions, structure organizations, and respond to change. To work as a sociologist, you will need to have a university degree. A bachelor's degree might help a person obtain an entry-level job such as an analyst, research assistant, caseworker, copywriter or social worker, but a Ph.D. is required for most positions in colleges and universities, as well as many professional positions. Excellent written and oral communication skills are essential. Mathematical skills and the ability to use computers for research purposes are mandatory in most disciplines. Many sociologists find employment in universities or colleges as researchers and teachers. Others specialize in population studies, marriage and the family, crime and delinquency, social inequality, politics and urban planning. The average earnings are about $35,000 a year; but with a MA or higher with at least five or more years of experience, the average wage can range from $40,000 to $60,000.

GENERAL INFORMATION

Not all universities with this major are listed below. The lower division core preparation is listed for universities with which LBCC has established articulation agreements. The first course listed is the LBCC course; the course in parentheses immediately after is the university equivalent. It is generally recommended to take as many lower-division major courses as possible prior to transfer. Please check www.assist.org for the most current articulation information and information regarding minimum grade for each course, impacted major recommendations, application procedures, etc. Moreover, you must see a counselor to develop an accurate educational plan to ensure your competitiveness for admissions for your school(s) of choice. To thoroughly understand admissions and general education requirements please check the catalog of the transfer university. CSU/UC admissions and general education requirements are outlined on a separate curriculum guide.

*** Schools are listed in alphabetical order ***

CAL POLY, POMONA
