ANTHROPOLOGY

CAREER INFORMATION

Anthropology is the study of human behavior. An anthropologist is a trained observer who knows the importance of collecting data, in listening and watching what others are doing, and researching the context. Several ranges of study consist of culture and social relations, human biology and evolution, languages, music, art, architecture, and human habitation. Students should develop a firm background in social studies, history, math, science, biology, and both English and foreign languages. The minimal educational requirement to work as a field anthropologist is a B.A. or B.S. degree with a major in anthropology or archaeology and previous field experience. While this is sufficient to work in an anthropology field, it is not sufficient to move into supervisory roles. Supervisory positions require a graduate degree, either an M.A./M.S. or a Ph.D. Some of the fields that anthropologists find work are in medicine, public health, ethnic, community or area studies, linguistics, teachers and museum curators.

GENERAL INFORMATION

Not all universities with this major are listed below. The lower division core preparation is listed for universities with which LBCC has established articulation agreements. The first course listed is the LBCC course; the course in parentheses immediately after is the university equivalent. It is generally recommended to take as many lower-division major courses as possible prior to transfer. Please check www.assist.org for the most current articulation information and information regarding minimum grade for each course, impacted major recommendations, application procedures, etc. Most universities require that each course be completed with a grade of C or higher. Moreover, you must see a counselor to develop an accurate educational plan to ensure your competitiveness for admissions for your school(s) of choice. To thoroughly understand admissions and general education requirements please check the catalog of the transfer university. CSU/UC admissions and general education requirements are outlined on a separate curriculum guide.
